Cagliari, Italy · Italian, English · remote work; relocation or regular travel possible

PROFILE

I lead technical delivery, and I still design and write the software. For fifteen years I have owned the technical direction and the organization required to take it into production. The work crosses industries, with enterprise customers and large delivery partners: integrations, customer-facing applications, and training for the engineering teams who run what we deliver. Today I lead squads of three to six. I set architecture, roadmap, and who delivers what, and I remain in review and implementation.

SKILLS

TypeScript • JavaScript • React • Angular • Node.js • Mobile • MongoDB • and more
HTML • CSS • REST APIs • ServiceNow • Git & CI/CD • and more
Technical leadership • Project coordination • Agile delivery • Technical training • and more

EXPERIENCE

Engineering Manager & Technical Lead

Stackhouse – Spindox · Sep 2024 – Present

- Ship features in React, TypeScript, REST, and ServiceNow (SAM, ITSM, widgets, flows).
- Lead squads of 3–6: roadmap, sprint planning, priorities, and retrospectives with product and customers.
- Set architecture, trade-offs, and solution design, plus scope, priorities, and who delivers what.
- Raise quality in review and pairing, and leave shared integration libraries for the next project.

Professional Services Lead & Technical Trainer

Vivocha · Jul 2012 – Sep 2024

- Built custom integrations and customer-facing web applications for enterprise clients across industries, including work with large delivery partners.
- Owned delivery from discovery to go-live, including scope and priority changes with the customer.
- Ran hands-on workshops for international engineering teams on JavaScript SDKs and REST APIs.
- Handled second-level support after release, including SLA-critical production issues.

Developer & University Intern

Reilabs · 2010 – 2012

- Web analytics product: full-stack features, REST feeds, and KPI dashboards.

SELECTED PROJECTS

Nomad. Product I conceived and built. Mobile-first offline travel companion (TypeScript, Expo, React Native, Hono, MongoDB). MVP feature-complete, with CI, tests, and Italian/English. nomadtravel.guru

Platform engineering. Web delivery I both plan and implement, built on shared integration libraries.

Enterprise integrations. Custom integrations and embeddable chat widgets for enterprise clients across industries, from scoping through delivery.

EDUCATION

B.Sc. Computer Science, University of Cagliari (2011)
